

ABHRANSHU AKASH

B.E. – CSE (Data Science) | RNSIT, Bengaluru
+91 9905883384 | abhranshu1@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Data Science engineering student with a 8.68 CGPA, strong hands-on experience in AI/ML, full-stack development, and NLP. Built and deployed multiple AI-powered systems across cybersecurity, agriculture, and accessibility domains. Competitive hackathon performer with Top 5 and Top 10 finishes in 7+ national competitions.

TECHNICAL SKILLS

Languages	Python · C · Java · JavaScript · HTML/CSS
Data & ML	Machine Learning · NLP · Data Analysis · Feature Engineering · Scikit-learn · Big Data
Databases	PostgreSQL · MySQL · MongoDB
Frameworks	ReactJS · REST APIs
Tools	Git · GitHub · Power BI · Tableau

PROJECTS

ATLAS-TDI — Adaptive Trust & Drift Intelligence for IoT Networks

Feb 2026 – May 2026

Mentor: Dr.Naveen L | Team Size: 4

Skills: Machine Learning · Python · ReactJS · PostgreSQL · Data Analysis · GIT

- Designed an AI-powered cybersecurity monitoring system that continuously analyzes IoT device behavior to detect anomalies and suspicious activity in real time.
- Applied ML-based drift detection to flag behavioral deviations and generate explainable alerts, helping security teams respond faster to threats.
- Built a full-stack dashboard using ReactJS and PostgreSQL to visualize device trust scores and threat timelines.

GrievanceAI — Intelligent NLP Grievance Management System

Feb 2026 – May 2026

Mentor: Dr. Mahantesh K | Team Size: 2

Skills: NLP · Machine Learning · PostgreSQL · ReactJS · API · Deployment

- Built an intelligent citizen grievance portal that uses NLP to automatically detect language, classify intent, extract entities, and route complaints to the correct government department.
- Eliminated manual form-filling by auto-populating structured complaint forms from unstructured text input.
- Deployed the full-stack system with a ReactJS frontend and PostgreSQL backend, supporting multi-language grievances.

Sahakar — AI-Driven Agricultural Price Negotiation & MSP Compliance

Dec 2025

Team Size: 4

Skills: Machine Learning · Multi-Agent AI · SQL · Full-Stack

- Trained an ML-based negotiation model that bargains with buyers on behalf of farmers using real-time market data and historical price trends.
- Integrated automatic MSP (Minimum Support Price) enforcement to prevent underpricing and protect farmer livelihoods.
- Built role-based access for farmers, buyers, and administrators with a transparent, middleman-free marketplace.

Cortexa — AI-Powered Transcription & Summarization for Neurodivergent Learners

2025

Skills: OpenAI Whisper · Chrome Extension · JavaScript · AI Summarization

- Developed a Chrome extension providing real-time transcription and structured bullet-point summaries during video calls, designed for ADHD and neurodivergent learners.
- Integrated OpenAI Whisper for low-latency, high-accuracy speech-to-text processing with downloadable transcript support.

EDUCATION

RNS Institute of Technology, Bengaluru
B.E. – CSE (Data Science) | CGPA: 8.71 / 10
Delhi Public School, Patna
12th – CBSE

2023 – 2027

2020

HACKATHONS & COMPETITIONS

- Participated in 7+ national and inter-college hackathons; secured Top 5 in 3 competitions and Top 10 in 2 others through AI-driven solutions.
- Key domains competed in: AI/ML, AgriTech, Accessibility, NLP, and Cybersecurity.

CERTIFICATIONS

- Introduction to Structured Query Language (SQL) — Coursera / University of Michigan
- Design and Analysis of Algorithms (ADA) — NPTEL, Government of India
